SUCTION CUP MANUAL

产品名称及规格
Product Name And Specifications

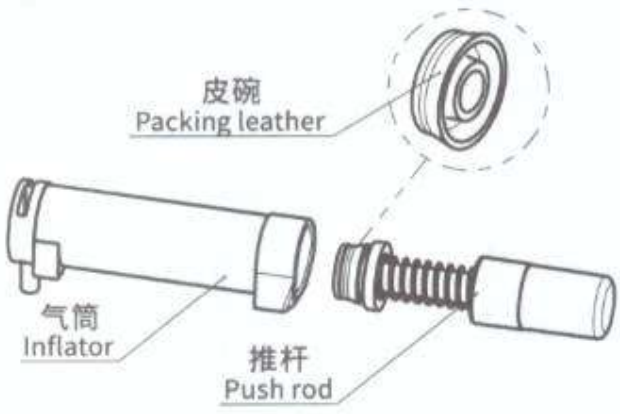

吸盘规格 Specification of suction cup	4英寸 4in.	6英寸 6in.
顶盖材质 Material of top cap	尼龙 Nylon	尼龙 Nylon
吸盘材质 Material of suction cup	三元乙丙 EPDM	三元乙丙 EPDM
水平吸力 Horizontal suction force	60KG	80KG
垂直吸力 Vertical suction force	40KG	60KG
吸盘直径 Diameter of suction cup	12CM	15CM
重量 Weight	0.56KG	0.75KG

产品使用说明
Product Instructions

用手向下施力使吸盘贴合被吸附面

Apply downward force to make the suction cup closely contact the adsorbed surface

重复按压推杆,排除吸盘内空气,直到看不见白色安全警示带为止

Repeatedly press the push rod to exhaust air in the suction cup until the white warning tape is not visible.

如果看到推杆的白色安全警示带,则需要重新安装吸盘。

If the white warning tape is still visible, the suction cup should be re-installed.

安装(Installation)

1、如果需要,清洁安装表面和吸盘的内表面,在吸盘密封边缘涂抹水分。

Clean the mounting surface and the inner surface of the suction cup if needed, and slightly wet the sealing edge of the suction cup.

2、如果您的吸盘在使用过程中失去真空,可以看到白色警示带。

In case of insufficient vacuum of the suction cup during the usage, the white warning tape will be visible.

3、按压推杆,直到吸盘完全贴合到安装表面,并且看不到白色警示带。

Press the push rod until the suction cup completely contacts the mounting surface, and the white safety warning is not visible.

4、经常检查推杆以确保吸盘保持牢固吸附。如果白色警示带出现,请再次按压气筒。

Regularly check the push rod to ensure that the suction cup is firmly attached to the mounting surface. In case of visible white warning tape, please press the inflator again.

释放(Removal)

1、用手指抠开吸盘边缘,直到吸盘失去真空压力并从安装表面释放。

Prize the edge of the suction cup from the mounting surface with your fingers until the suction cup is free of vacuum pressure and removed from the mounting surface.

不使用时(When it is not in use)

1、每次在腐蚀性环境中使用后,请用淡水清洁吸盘并扣上保护盖或把吸盘放入保护袋。

Clean the suction cup and with fresh water and fasten the protective cover or put the suction cup into a protective bag when it is used under the corrosive condition.

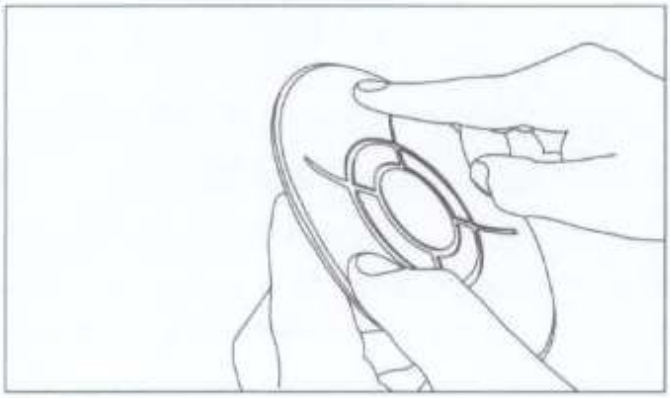

2、为了最大程度地延长使用寿命,请勿在不使用时将吸盘存放在阳光下。

To maximize the service life of the suction cup, please do not store it in direct sunlight when it is not in use.

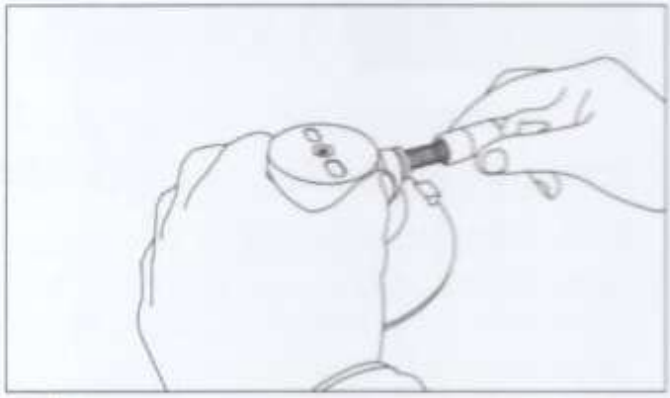

如果推杆的白色安全警示带保持少于3小时,并频繁露出白色安全警示带,则必须对吸盘进行维护!

If the white warning tape on the push rod is kept for less than 3h and is frequently visible, the suction cup is required to be maintained!

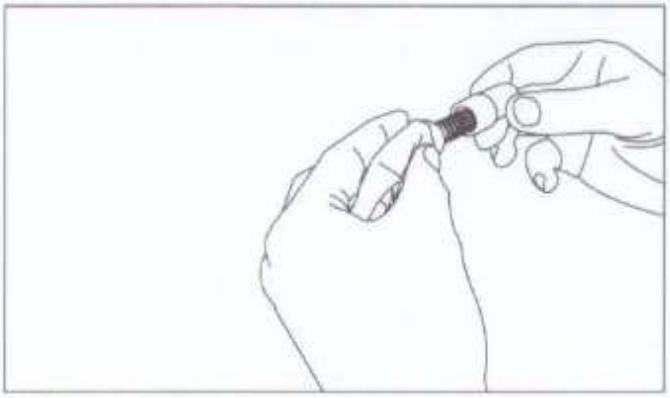

产品保养说明
Product Care Instructions

1 先检查吸盘边缘有没有划伤
Check whether there are scratches on the edge of the suction cup.

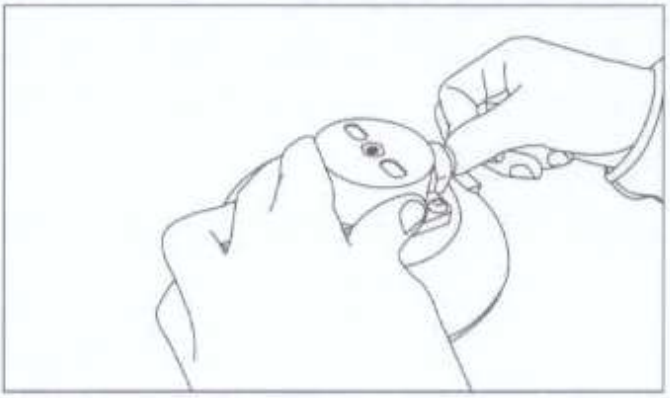

2 用力拔出推杆
Pull out the push rod

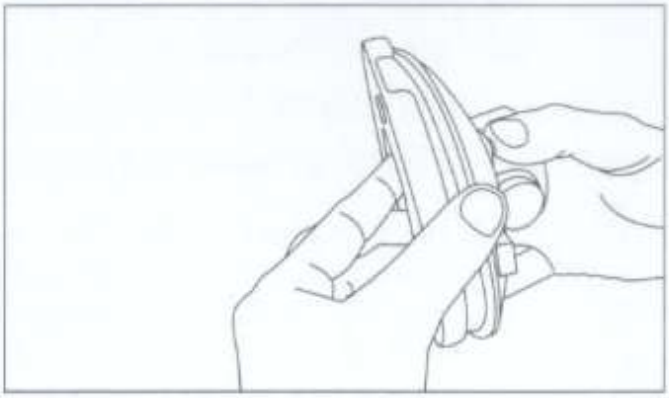

3 用纸巾或抹布清洁推杆、皮碗、内腔和气阀
Clean the push rod, packing leather, inner cavity and air valve with a paper towel or cleaning cloth .

4 用保养油挤一点到推杆上的橡胶皮碗上，然后用手涂抹均匀
Apply the maintenance oil onto the rubber packing leather on the push rod evenly with your hands.

5 把推杆再装回气筒
Assemble the push rod to the inflator

6 然后压紧扣上吸盘保护盖,防止吸盘盘面划伤
Fasten the protective cover of the suction cup to avoid any scratches on the surface of the suction cup .

吸盘常见故障及解决方法
Common Failures And Solutions Of Suction Cups

	常见故障点 Common failures	解决办法 Solutions
1、吸盘漏气 Poor vacuum of suction cup	安装表面及吸盘的橡胶内表面太干燥，有异物 Dry mounting surface and the rubber inner surface of the suction cup, with foreign matters .	清洁安装表面和吸盘表面，并在安装表面均匀的喷一点水 Clean the mounting surface and the inner surface of the suction cup, and slightly wet the mounting surface evenly
	吸盘边缘有划伤 cratches on the edge of the suction cup	更换吸盘 Replace the suction cup
	气筒内表面有划伤（有泥沙及其它异物进出气筒没有及时保养造成） Scratches on the inner surface of the inflator (caused by mud, sand and other foreign matters in the inflator, without timely maintenance)	更换气筒 Replace the inflator
	皮碗边缘有划伤 Scratches on the edge of the packing leather	及时保养（参考吸盘保养章节） Timely maintenance(refer to the Maintenance of Suction Cup)
2、吸盘不能抽真空 The suction cup fails to be vacuumized	**常见故障点 Common failures**	**解决办法 Solutions**
	气筒内橡胶贴片不牢 Weak adhesion of the rubber patches inside the inflator .	用平底的圆柱物体压紧气筒内贴片或更换气筒，注意不要用尖锐的边缘划伤气筒内表面 Tightly press the inner patches of the inflator with a flat-bottomed cylindrical object or replace the inflator, please notice that do not scratch the inner surface of the inflator with a sharp edge
	气筒外壳破裂 Cracks on the inflator shell .	更换气筒 Replace the inflator
	橡胶吸盘边缘有很深的压痕或缺口 Deep impressions or notches on the edge of the rubber suction cup .	更换橡胶吸盘 Replace the rubber suction cup .
	安装面不平整，橡胶吸盘边缘没有完全与安装面接触 The mounting surface is not flat, and the edge of the rubber suction cup fails to completely contact the mounting surface.	更换吸盘安装位置，用力压紧吸盘使其边缘与安装面完全接触 Change the installing place of the suction cup, and press firmly to make full contact between the edge of the suction cup and the mounting surface
3、气筒推杆运行不顺畅 Unsmooth movement of the push rod on the inflator	**常见故障点 Common failures**	**解决办法 Solutions**
	气筒内太脏 Too many foreign matters inside the inflator	保养气筒（参考吸盘保养章节） Maintain the inflator (refer to the Maintenance of Suction Cup)
	气筒内缺油脂 Insufficient grease inside the inflator.	

警告
Warning

- 不注意这些警告可能会损坏你的吸盘或负载，或伤害用户。
  Pay attention to the following warnings, otherwise, the suction cup and its load capacity will be damaged, or users will be injured.

- 请严格按照吸盘的载荷能力使用吸盘
  Please use the suction cup in strict accordance with its load capacity.

- 不允许用吸盘来载人或超过其载重能力的场景。
  Do not use the suction cup to carry people or use it with the load exceeding its limit.

- 为了预防吸盘可能会意外脱离，不允许负载可能会造成伤害的物品。
  To prevent the accidental removal of the suction cup from the mounting surface, do not use it to load objects that may cause injury.

- 不要把吸盘安装在可能损坏吸盘密封边缘的表面上。
  Do not install the suction cup on the surface that may damage the sealing edge of the suction cup.

- 避免用在可能导致您的吸盘滑动或漏气的情况，如污染物，安装表面有刮伤，不平整
  Do not use the suction cup under the condition that may make it slide or with poor vacuum, such as the mounting surface with contaminants, scratches or uneven surface.

- 当吸盘白色安全线外露时，请重新安装吸盘。如果安全线频繁出现，请停止使用，并参考故障排除指南。
  When the white warning tape of the suction cup is completely visible, the suction cup is required to be re-installed. It the warning tape is visible frequently, please stop using the suction cup, and refer to the troubleshooting guide.

- 在使用过程中避免有任何物体接触吸盘边缘和气筒，以防止意外打开吸盘
  During the usage, protect the edge and the inflator of the suction cup from being touched by any objects, to prevent accidental opening of the suction cup.

- 请勿用溶济或其它一味腐蚀性物质清洗吸盘
  Do not clean the suction cup with solvents or other corrosive substances.

- 吸盘顶部的螺纹长度为8mm，请不要把更长的螺钉拧入其中，防止损坏气筒
  The length of thread on the top of the suction cup is 8mm, please do not screw longer screws into it to avoid any damages to the inflator.

Product Warranty And Disclaimer

产品保修 Product Warranty

自您签收日次日起7日内,本产品如有出现《产品质保范围》所列内的情况,可联系客服寄回绿树蛙,以进行更换或维修(由绿树蛙公司选择),质保必须随附销售发票或其他购买凭证。

Within 7 days after you receive the product, in case of any failures listed on the Product Warranty Scope for the product, please contact the customer service staff to send it back to Tree Frog for replacement or maintenance (depending on Tree Frog), and the sales invoice or other proofs of purchase shall be attached for the warranty.

产品质保范围 Product Warranty Scope	
1、吸盘漏气 Poor vacuum of suction cup	7天无理由退换,1年免费保修(运费自理) 7-day no-reason changing or refunding, 1-year free warranty (freight charge is paid by users)
2、吸盘不能抽气 The suction cup fails to be vacuumized	
3、推杆不顺畅 Unsmooth movement of the push rod	
4、吸盘外观瑕疵 Appearance defect of the suction cup	
5、吸盘老化、表面龟裂 Aging and surface checking of the suction cup	3年免费保修(运费自理) 3-year free warranty (freight charge is paid by users)
6、存放不当导致划伤、腐蚀 Scratches and corrosion caused by improper storage	不保修 No warranty
